TAKING RAPID ASSESSMENTS TO THE NEXT LEVEL

PrintFleet™ Suite Pro

Are you still walking around your clients' offices, performing lengthy assessments? How much time and energy does a single assessment take? Does the process limit the amount of clients you can introduce to print management?

PrintFleet Suite Pro is a USB tool that helps you rapidly assess your clients' printing environments. With no hardware or software to install, and unlimited network scans for one low fee, PrintFleet Suite Pro gets your foot in the door with all your print management prospects—it's your first step towards continuous print management.

PrintFleet Suite Pro Key

Testimonial

"PrintFleet software offered an opportunity for the biggest impact. I am convinced this is good for the company; this is good for service; this is good for sales."

Lee Rummage
RJ Young Company

Extensive data collection

PrintFleet software applications collect the most comprehensive set of data available, including vendor error codes, toner and non-toner supply levels, device status, complete meter breakdowns, manufacturers, serial numbers and more.

SmartScan discovery

Device discovery and data collection is as simple as one click. Click the SmartScan button to automatically detect appropriate scan settings and complete a network scan. An Advanced Scan option is available if you prefer a manual configuration.

Network recognition and file mapping

Create customer accounts and the software will automatically detect the appropriate network and filter your scan result files into the appropriate customer folder on the USB key. Organizing your audit files has never been easier.

Customizable interface

Customize PrintFleet Suite Pro to match your corporate brand, by uploading your logo, entering your corporate URL, and customizing the product name.

Unlimited network scans for one low fee

With no pay-per-use fees, you can feel free to demonstrate the potential of print management to all of your clients.

PrintFleet™ Suite Pro

How it Works

Plug the PrintFleet Suite Pro USB key into any network connected PC at a client site. Choose to automatically detect or manually input the appropriate IP ranges, and then watch as the program quickly collects valuable metrics from printers, copiers, fax machines, and multifunction devices.

3 Powerful Programs

Auditor

Collect comprehensive data from imaging devices on the network, access embedded web pages, restart devices, send a test print job, and more.

Asset Tracker

Embed serial numbers, asset numbers, locations, and departments to the non-volatile memory of imaging devices.

IP Analyzer

Locate used and available IP addresses on the network, and detect the hostname, HTTP, HTTPS, SNMP, and RDP status of each.

Once you have demonstrated the potential of print management to your clients with PrintFleet Suite Pro, use one of our remote monitoring software products to gain access to continual information that will allow you to automate meter collection, develop proactive supplies and service programs, and generate historical trending reports.

Contact PrintFleet today for a software demonstration.
