

PRINTFLEET CORPORATE™

PRINTFLEET®

Corporate includes:

- > PrintFleet's award-winning Optimizer™ application
- > Unparalleled data collection, reporting and alerting capabilities
- > Ability to manage a virtually unlimited number of devices
- > A reliable and scalable managed print solution

Corporate

Corporate is a complete remote monitoring solution that allows end users to capture, store, analyze and process critical device data on-site.

PrintFleet Corporate reduces the complexity of managing imaging devices from multiple manufacturers and provides the flexibility to manage an entire print environment with a single tool for control and accountability.

**ON-PREMISE
DATA STORAGE**

**ROBUST ALERT
FUNCTIONALITY**

**COMPREHENSIVE
REPORTING**

**SUPPLY AND SERVICE
MANAGEMENT**

For end user environments with sealed networks that do not allow any communication outside the network, including email, cloud-based applications or Internet, Corporate enables end users to maintain device data on-site for privacy and complete control over their device management.

Features

Customer Hosted

- End user hosts the application, stores and maintains device data on-site

Alerts

PrintFleet Corporate provides comprehensive alerting capabilities for proactive device management:

- Create status alerts based on event and occurrence thresholds, triggers, standard and vendor error codes, and even LCD screen text
- Identify potential issues before they become problems
- Generate a single alert to notify you at the event start and event end
- Be notified when selected alert conditions happen multiple times over a specified time period
- Use occurrence thresholds to help avoid sending technicians for trivial issues

Comprehensive Reporting

- Create customized data reports
- Schedule reports to know where and when supplies are required
- Automatically send customized reports to email recipients on a predetermined basis or download in

.PDF format with a custom branded cover directly from the application

Device Data Views

PrintFleet Corporate offers several different views of device data, including:

- **Technical View** – view basic device information including device name, supplies status, device status, meter count, serial number, IP address, location and last active date
- **Supplies Order View** – see supply-related information including toner levels and status
- **Alerts View** – see the number of devices with recent alerts, and a link to view alert details for each device
- **Maps View** – quickly identify and locate devices requiring attention

Device Locations and Map

- Import an image of an office floor plan and place the devices in their actual locations
- Use this to reallocate, consolidate, replace, or retire devices, or to simply and quickly locate a particular device
- Receive a quick notification of device status with flashing indicators
